DETAILED ACTION

Specification

1. The abstract is objected to because it exceeds one paragraph. The abstract should be reformatted as a single paragraph.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Hopkins et al. (US 20010009948).

Claims 7-11 include a product-by-process limitation directed to desolvation under alkaline conditions. Product-by-process claims are interpreted according to MPEP 2113:

PRODUCT-BY-PROCESS CLAIMS ARE NOT LIMITED TO THE MANIPULATIONS OF THE RECITED STEPS, ONLY THE STRUCTURE IMPLIED BY THE STEPS.

“[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process.”

In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985)

ONCE A PRODUCT APPEARING TO BE SUBSTANTIALLY IDENTICAL IS FOUND AND A 35 U.S.C. 102 /103 REJECTION MADE, THE BURDEN SHIFTS TO THE APPLICANT TO SHOW AN UNOBVIOUS DIFFERENCE. "The Patent Office bears a lesser burden of proof in making out a case of prima facie obviousness for product-by-process claims because of their peculiar nature" than when a product is claimed in the conventional fashion. *In re Fessmann*, 489 F.2d 742, 744, 180 USPQ 324, 326 (CCPA 1974). Once the examiner provides a rationale tending to show that the claimed product appears to be the same or similar to that of the prior art, although produced by a different process, the burden shifts to applicant to come forward with evidence establishing an unobvious difference between the claimed product and the prior art product. *In re Marosi*, 710 F.2d 798, 802, 218 USPQ 289, 292 (Fed. Cir. 1983).

The reference shows in Example 1 an isoprene rubber functionalized with 3-aminopropyl-triethoxysilane during an extrusion process, and includes all recited structural features of claims 7-11. The claimed process feature recites that at some time in the history of the rubber, at least a non-zero amount of solvent is removed under alkaline conditions. However, given the extraordinary breadth of both the process limitation as well as the starting resin, there is nothing on the record which indicates that the reference polymer would be outside the scope of the claims. The burden of proof is shifted to applicants to show that the reference examples are outside the full scope of the claims.

4. Claims 12-17 are objected to as being dependent upon a rejected base claim, but would be allowable over the prior art currently of record if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
